

92

Walton Burns LLC's website scored 92/100. The fastest path to improvement is tightening Performance and resolving the highest-severity issues first.

Total Issues: 5

Healthy Growth Foundation

Priority Fix Roadmap

SEO | MEDIUM | OPTIMIZATION OPPORTUNITY

Images are missing alt text

Operational Improvement

Issue: 12 image tags do not include alt attributes.

Business impact: Alt text supports accessibility and gives search engines image context.

Recommended fix: Add descriptive alt text to meaningful images and empty alt text to decorative images.

Fix example

```

```

Suggested tools: Smush, Imagify, ShortPixel, Cloudflare Images

PERFORMANCE | MEDIUM | OPTIMIZATION OPPORTUNITY

Images are not lazy loaded

Operational Improvement

Issue: Several images are present, but native lazy loading was not detected.

Business impact: Unoptimized image loading can delay Largest Contentful Paint and waste mobile bandwidth.

Recommended fix: Add loading="lazy" to below-the-fold images and serve responsive WebP/AVIF assets.

Fix example

```

```

Suggested tools: Smush, Imagify, ShortPixel, Cloudflare Images

MOBILE | MEDIUM | OPTIMIZATION OPPORTUNITY

Fixed-width layout hints detected

Operational Improvement

Issue: The markup or inline styles contain desktop-sized fixed widths.

Business impact: Fixed layouts can create horizontal scrolling and low mobile usability.

Recommended fix: Use fluid containers, responsive grid tracks, and breakpoint-specific constraints.

Fix example

Prioritize this fix in the next optimization sprint and validate it in a follow-up scan.

Suggested tools: Lighthouse, PageSpeed Insights, Search Console

ACCESSIBILITY | MEDIUM | OPTIMIZATION OPPORTUNITY

Icon-only buttons may need labels

Operational Improvement

Issue: Some buttons appear to contain no accessible text.	Business impact: Assistive technology needs a programmatic name for every control.	Recommended fix: Add aria-label text to icon-only buttons.
--	---	---

Fix example

```
<label for="email">Email address</label>
<input id="email" name="email" type="email" autocomplete="email">
```

Suggested tools: axe DevTools, Pa11y, WAVE, Lighthouse Accessibility

TECHNICAL | MEDIUM | OPTIMIZATION OPPORTUNITY

Placeholder links detected

Operational Improvement

Issue: Some links point to # or javascript: placeholders.	Business impact: Placeholder links frustrate visitors and can make pages look unfinished.	Recommended fix: Replace placeholder links with real destinations or remove inactive controls.
--	--	---

Fix example

Prioritize this fix in the next optimization sprint and validate it in a follow-up scan.

Suggested tools: Lighthouse, PageSpeed Insights, Search Console

Next Step

The scan found 0 critical and 0 high-priority issues that can affect search visibility, buyer trust, conversion tracking, or page speed.
