

NextCareerWay – Feature Requirements & Improvements

Admin Panel Requirements

Dashboard & Management

- Create a professional admin panel similar to large job portals such as Naukri.com and Apna.com.
- Admin panel should be completely separate from the frontend.
- Dedicated secure admin login system.
- Modern dashboard with statistics:
 - Total Jobs
 - Active Jobs
 - Expired Jobs
 - Total Companies
 - Total Users
 - State-wise Jobs
 - City-wise Jobs
 - Daily Job Imports

Job Management

- Admin can:
 - Add, edit, delete, and approve jobs.
 - Modify imported job details manually.
 - Change job categories and job locations.
 - Mark jobs as featured.
 - Manage expired jobs.

Category & Location Management

- Manage:
 - Job Categories
 - States
 - Cities
 - Districts
 - Job Types
 - Industries

Company Management

- View all companies.
- Edit company details.
- Block suspicious companies.
- Track job posting history for each company.

User Management

- View all user details.
- Manage user accounts.
- Suspend or block users.
- View saved jobs and application activities.

Cron Job Monitoring

- Dedicated Cron Dashboard:
- Last cron execution time.
- Next scheduled cron run.
- Jobs imported per cron.
- Failed imports.
- Error logs.
- Source-wise import statistics.

Site Control

- Maintenance Mode ON/OFF.
- Enable or disable specific modules.
- Sitemap regeneration control.
- Cache clearing options.

Security

- Two-Factor Authentication (2FA).
 - Login activity logs.
 - IP restriction for admin accounts.
 - Brute-force protection.
 - Audit logs for all admin actions.
 - Session management and forced logout.
 - Secure password policy.
-

User Features

User Dashboard

- Professional profile dashboard.
- Edit profile details.
- Upload resume.
- Manage skills and experience.

Saved Jobs

- Save/Favorite jobs.

- Dedicated Saved Jobs section.

Account Management

- Change password.
- Forgot password functionality.
- Email verification.

Job Applications Tracking

- Track outbound job applications.
- Store application history.
- Track clicked Apply links.
- Application analytics dashboard.

Reporting System

- Report fake jobs.
- Report spam jobs.
- Report incorrect information.
- Report expired jobs.

Notifications

- Job alerts by email.
- Category-wise notifications.
- Location-based notifications.
- Weekly job digest.

Additional Website Features

Contact Us

- Professional contact page.
- Inquiry form.
- Admin inquiry management panel.
- Auto-reply emails.

Anti-Spam Protection

- Google reCAPTCHA.
- Honeypot protection.
- Rate limiting.
- Form spam filtering.

Bot & Scraper Protection

- Cloudflare integration.
- Anti-scraping protection.
- Request throttling.
- User-Agent validation.
- Hidden API protection.

Traffic & Security Management

- Detect suspicious traffic.
- Redirect malicious requests to:
 - 404 Page
